Title:

Total knee arthroplasty after high tibial osteotomy and unicompartmental knee arthroplasty

Authors:

T. Duivenvoorden, J.A.N. Verhaar, M.Reijman, H. Verburg, R.W. Brouwer, T.Voskuil

Abstract:

We want to perform a survival analysis of patients who underwent total knee arthroplasty (TKA) after high tibial osteotomy (HTO) or unicompartmental knee arthroplasty (UKA) and compare these survival rates with patients without prior surgery.
